Authx Reference - API Extra

SessionIntegration

Warning

You need to install dependencies to use The Session Integration.

```
$ pip install authx_extra
```

class authx_extra.session.SessionIntegration

```
SessionIntegration(store, session_id, session_save)
```

Source code in `authx_extra/session.py`

```
def __init__(self, store, session_id, session_save):
    self.session_store = store
    self.session_id = session_id
    self.session_save = session_save
```

attr session_store instance-attribute

```
session_store = store
```

attr session_id instance-attribute

```
session_id = session_id
```

attr session_save instance-attribute

```
session_save = session_save
```

meth get_session async

```
get_session()
```

Get the session store.

Source code in `authx_extra/session.py`

```
async def get_session(self):
    """Get the session store."""
    return self.session_store
```

meth clear_session async

```
clear_session()
```

Clear the session store.

Source code in `authx_extra/session.py`

```
22  async def clear_session(self):
23      """Clear the session store."""
24      self.session_store.clear()
```

meth get_session_id async

```
get_session_id()
```

Get the session ID.

Source code in `authx_extra/session.py`

```
26  async def get_session_id(self):
27      """Get the session ID."""
28      return self.session_id
```

meth save_session async

```
save_session()
```

Save the session store.

Source code in `authx_extra/session.py`

```
30  async def save_session(self):
31      """Save the session store."""
32      await self.session_save()
```
